

Skills

Languages : Javascript / Node.js , Python , C/C++ , SQL

Frameworks : Pyspark , Opencv ,Tensorflow , Pytorch , Pandas , Scipy , Numpy , Pyarrow , NLTK , Spacy , SHAP , LangChain, MCP

Devops : Windows/Linux/MacOS CL , Bash , Docker , Kubeflow , Git / Version Control , CI/CD , DVC , Apache Airflow , Mlflow

Platforms : AWS - EC2 , EMR , S3 Bucket , RabbitMQ , Lambda functions , Sagemaker , GCP - Cloud functions , BigQuery

Datascience : EDA , Supervised Learning methods , Regression models , Statistical models , NLP , Time series forecasting

Experience

Virtusa

<https://virtusa.com/>

Datascientist - Gen AI

Projects

Intuit

<https://intuit.com/>

- Node Classification:** Engineered ML models on Neo4j to automate the identification and classification of sensitive node
- MCP Development:** Created and deployed MCP tools to streamline CRUD operations within the internal data catalog
- Graphrag Implementation:** Constructed GraphRAG knowledge graphs to analyze complex relationships

Bangalore , India

Sep 2025 - Present

TCS

<https://tcs.com/>

AI and Machine Learning - Product Engineer

Projects

Aadhaar

<https://myaadhaar.uidai.gov.in/>

- Fingerprint Segmentation:** Trained and deployed a custom YOLO model, boosting authentication accuracy by 35%
- Gender Prediction:** Trained our own model to enhance its accuracy by 96 % thereby strengthening fraud mitigation
- Age Prediction:** Leveraged a custom age-prediction model, boosting accuracy by 43% to enhance fraud detection
- Support Chatbot:** Developed a Retrieval-Augmented Generation based AI chat assistant using Langchain and Ollama
- Achieved over a 50% improvement in throughput across all developed models by converting them to TensorRT format

Bangalore , India

Dec 2022 - Sep 2025

Edvanza

<https://edvanza.com/>

Machine Learning Engineer

Projects

- Salary Prediction:** Performed EDA, Model Training and Evaluation, Hyperparameter Tuning, and XGBoost deployment
- Skills Annotation:** Conducted EDA, Model Training and Evaluation, Hyperparameter Tuning, and BERT model deployment
- Topic Modelling:** Performed EDA, Model Training and Evaluation, Hyperparameter Tuning, & BERTopic model deployment
- Semantic Matching:** Worked on EDA, Model Training and Evaluation, Hyperparameter Tuning, LSTM model deployment
- Developed and executed data transformation, migration, and cleaning workflows using Apache Airflow involving DAGs

Hyderabad , India

Aug 2021 - Oct 2022

SHC Technologies

<https://shctech.io>

Fullstack & Deep Learning Developer

Projects

Zeatool

<https://zeatool.com>

- EHR Automation:** Developed model that optimizes EHR recording using a language model, increasing accuracy by 90%
- FAQ Chatbot:** Developed a Question Answering application that provides answers to clients based on semantic similarity
- Tweet Sentiment Analysis:** Retrieves COVID-19 tweets and analyzes their sentiment using our trained language model
- Dynamic Price Forecasting:** Developed & validated an ARIMA model on de-identified Intensive Care Unit (ICU) patient data
- Developed ETL pipeline for data processing, using Python, Pandas, & NumPy to load into database via RabbitMQ

Hyderabad , India

Apr 2019 - Jul 2021

Education

Karpagam college of engineering

Bachelor of Engineering in Electronics and Communication Engineering ; GPA : 7.9

Coimbatore , Tamilnadu

Apr 2014 - Mar 2018

Courses & Certifications

Deep Learning Specialization
